stamp ME

TYPES OF STAMP METHODS

At Stamp Me, we believe the more options, the better. Especially when it comes to stamp issuing, where finding what suits your business best is essential. So let's dive in to the various delightful methods for issuing stamps to your valued customers. Whether you're already running a successful program or just getting started, we've got you covered!

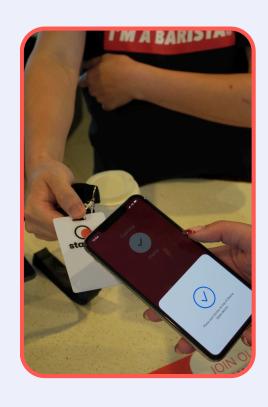

StampPod™

- **What is it?** A smart pod that works using **'tap and go'** technology.

- **How does it work?** To collect a stamp, customers simply press the 'Stamp Me' button on the stamp card and tap their phone on the device. A stamp will automatically be added.

- Perfect for **physical businesses** who are looking for a modern edge

- Order your StampPod today by filling out this form.

StampTag

- **What is it?** StampTags also work with 'tap and go' technology. They are ideal for environments where staff need a **portable validation method** or if the pod is not suitable

- **How does it work?** Just like the pod, customers press the 'Stamp Me' button and hold their phone to the tag. A stamp is automatically issued.

- Perfect for pubs, restaurants, **table service settings**.

- Order a StampTag today by filling out this form.
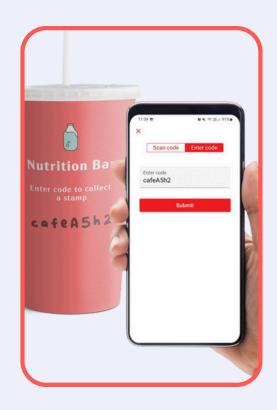

OneStamps (QR Code)

- **What is it? Single-use** QR codes that can be placed on products, packaging, or digital content. Customers simply scan the code from the in-app camera to receive a stamp.

- **Where do I get them?** You can order OneStamps (QR codes) from the ['Manage Stamp Methods' section](#) of your Merchant Console.

- Perfect for **takeaway food/delivery** services and online businesses, especially where in-person transactions are minimal or non-existent.

Sticky AF applies OneStamps to their disposable vape and cannabis products for customers to earn a stamp after making an online purchase.

OneStamps (Text)

- **What is it?** Unique **alphanumeric codes**, like "DEMO123" or "DEMO124" that can be entered once to apply a stamp and then expire. They can be placed on products, packaging, or digital content.

- **Where do I get them?** You can order OneStamps (text) from the ['Manage Stamp Methods' section](#) of your Merchant Console.

- Perfect for **takeaway food/delivery** services and online businesses

StampCode

- **What is it?** A **QR code** that can be scanned multiple times to issue stamps. Members simply scan it using our in-App camera to collect a stamp. This serves as an immediate temporary solution.

- **Where do I get them?** You can download your Stamp Code(s) from your Merchant Console.

- Perfect for **physical businesses**, instantly accessible, easy to implement

- **Where can I display them?** The Stamp Code is best located near the POS or behind the cash register for access during qualifying purchases.

Fun fact: StampCodes are unique per location and Stamp Card. For example, if you have two locations and set up two stamp cards for each, you will receive four StampCodes.

Lux Nails Bar displays their StampCode at their point-of-sale so that customers can earn a stamp through the QR code.

A few quick things:

To manage your stamp methods, simply click 'Manage Stamp Methods' underneath your stamp card and you'll see the available stamp methods to the right hand side.
If you're uncertain about which stamp method suits your business best, don't hesitate to reach out to us! We're here to help you find the perfect fit.

Merchant Console

- **What is it?** Stamps are applied manually to a customer's profile.

- **How do I do it?** From the Merchant Console, head to the 'Members' area and press 'Give Stamps'. Follow the prompts and proceed. The stamps will apply to the member's stamp card after a few seconds.

- Perfect for on-the-go or **remote** merchants
